DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-53, 68-84 are drawn to a method of routing packets between source and destination, packet having a value which periodically changes within, classified in class 709, subclass 239.
- II. Claims 54-57 drawn to algorithmic manipulation to randomize data itself before and after transmission, classified in class 709, subclass 236.
- III. Claims 58-67 drawn to method of using encryption of data transmission packets through the network, classified in class 713, subclass 150.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
